

Hello coaches,

Just a quick note for the coaches attending the Dartfish training Monday June 1st in Hamilton.

I have attached a tentative agenda for the Dartfish session which covers the Dartfish basics: Capturing video, analyzing video and sharing video. For coaches with previous Dartfish experience, I will work with you individually to teach you more advanced Dartfish tools. Although I will be bringing selected trampoline, tumbling and double-mini videos to the course for you, please feel free to bring your own videos.

Please come prepared for the course with Dartfish loaded onto your computer and be ready to start at 8:00am. Other equipment you may wish to bring: video camera, firewire, tripod, Dartfish remote control and receiver.

If there are any coaches that will not have their own laptop and/or Dartfish 5.0 software, please let me know in advanced so I can try to make the necessary arrangements.

I have attached the document, "Camcorder Buying Guide" for those who wish to purchase a camcorder to use with Dartfish. NOTE: If you want to use Dartfish's *In The Action*, you must have a **miniDV** camcorder.

Cheers,

Carolyn Taylor Msc., DCI

Sport Biomechanist, Canadian Sport Centre Ontario

Dartfish Certified Instructor
